Summary

Full-Stack Web Developer and Computer Engineering student specializing in responsive web applications, Linux server administration, and cloud infrastructure. Proven track record of maintaining 99.5%+ system uptime and streamlining operational workflows.

Experience

Arkadian Haus Founder & Lead Web Developer

- Designed, developed, and maintained responsive web applications, internal operational tools, and administrative dashboards, streamlining operational workflows and reducing routine task completion time by 20%.
- Administered cloud hosting infrastructure and Linux server environments, managing virtual configurations and automated database backups to ensure system reliability and maintain over 99.5% website uptime.
- Spearheaded front-end software testing updates, diagnosed recurring software bugs, and resolved over 30 technical support issues based on user feedback.

September 2026 - Present — Thailand

Bureau of Technology and Cyber Crime, DSI Cyber Crime Investigation Intern

- Assisted senior officers in verifying routine inquiry records across 30+ administrative requests, strictly adhering to standard data verification procedures.
- Prepared structured daily operational logs and progress summaries to support internal workflow tracking for a 5-member team.
- Organized, formatted, and tracked technical documentation across 25+ active files to maintain 100% file accuracy and structured record keeping.

June 2026 - October 2026 — Thailand

Education

Rajamangala University of Technology Phra Nakhon

Bachelor of Engineering, Computer Engineering

- `Bangkok, Thailand | Expected Graduation: 2027 | GPA: 3.42`
- Relevant Coursework: Linux Operating Systems, Database Management, Software Testing, Computer Networks, Web Application Development, System Security, and Cloud Infrastructure.
- Completed intensive practical lab projects focused on configuring Linux server environments, optimizing relational databases, performing software testing, and maintaining structured technical documentation.

Certifications

Leadership and Digital Transformation | Cariber | 2026

- Completed training by Somkid Jiranuntarat on Design-Lead platform architecture, focusing on building user-friendly, scalable web applications and maintaining system stability and security.
- Studied technical strategies for modernizing cloud hosting infrastructure, implementing automated workflows, and aligning software development with user feedback.

Win by Rules, Succeed by Design | Cariber | 2026

- Completed coursework by Siriwat Vongjarukorn focused on systematic project design, IT operations management, and building reliable internal operational tools.
- Learned practical frameworks for diagnosing recurring technical bottlenecks, optimizing routine task workflows, and maintaining structured technical documentation.

Skills

Web Development: `HTML, CSS, JavaScript, React, Node.js, Responsive Web Design, Front-End Testing, Administrative Dashboards`
Server & Cloud: `Linux Server Administration, Cloudflare DNS & Security, Cloud Hosting , Automated Deployment (GitHub)`
Operations & Tools: `Database Management, Automated Backups, System Troubleshooting, Technical Support, Structured Documentation`
